Occupational Health and Safety Policy

Prepared in line with ISO 45001:2018 – certification targeted for 2027

Our commitment

- Provide safe and healthy working conditions and prevent work-related injury and ill health.
- Comply with Turkish occupational health and safety law (Law No. 6331) and other applicable requirements.
- Identify hazards and assess risks at every workstation – rolling mills, presses, bending cells, annealing furnaces and test stations – and eliminate or control them.
- Guard machines, provide suitable protective equipment and keep it in good condition.
- Train every employee before starting a new task and refresh the training regularly; contractors and visitors are briefed before entering the shop floor.
- Consult and involve employees and their representatives; everyone has the right to stop unsafe work.
- Investigate every incident and near miss and act on the root cause.
- Set safety objectives, review them yearly and improve continually.
